

ICAR-CIRB organized a Kishan Gosthi at Dabri

ICAR-CIRB organized a Kishan Gosthi at Dabri , the newly adopted village under the field progeny testing program. Dr TK Datta, Director, ICAR-CIRB addressed the gathering and explained the importance of genetic improvement to boost economy through milk production and processing. Around 100 villagers participated in the program and interacted with the scientific team of the ICAR-CIRB. Dr. RK Sharma and Dr A Dey highlighted the good breeding and feeding management practices, respectively. Dr Sanjay and Dr Supriya explained the process of field progeny testing. Dr Sunesh motivated farmers to learn more about scientific buffalo farming via exploring the online platforms developed and managed by CIRB. The team answered several buffalo farming and health management queries of the farmers. The program was also attended by the veterinary officer of the village and other supporting staff. The farmers were keen to stay connected with CIRB for genetic improvement of their Murrah buffalo herd.
